Liberate Your Messy CD/DVD Collection

Baldwin Park, CA August 9, 2006 –Never worry about scratching, misplacing or losing your CD/DVD or MINI DVD's. Innovative storage solutions giant Pengo Technologies releases a new product guaranteed to keep your desk clutter free and your priceless data or legacy memories organized and protected.

Pengo Technologies, Incorporated, one of the largest distributors of blank recordable discs, storage solution products and computer accessories in North America, Mexico, Caribbean and Latin America, expands their 2006 lineup with the innovative DisclIndex.

"The Pengo Technology DisclIndex is your perfect space saver," says Pengo Technologies President Su Huang. "At 12 ¼" x 5" x 5 ½" it's a miniature, streamlined, moveable disc file cabinet that is a comfortable fit on most surfaces. We even added rubber stoppers to avoid scratching counter tops and equipment," says Huang.

The DisclIndex comes with 50 high impact-ultra slim (4mm), multiple pastel colored patented jewel cases. Ideal for categorizing and organizing, the cases are designed to protect your standard and mini DVD discs from dust & scratches. The sturdy metal frame construction is lightweight with a tubular chrome finish.

The unit includes four bright and sturdy plastic movable dividers that are attached to the rack frame so they can't fall out or disappear. The simple open style and riser frame allows the user easy access and fast eye level identification. Two universal ring holes built into the rugged jewel cases allows you to transfer your discs to a binder.

Consumer friendly pricing with a Manufacturers Suggested Retail Price of only \$19.95!

Pengo Technologies Incorporated, brand name includes blank discs, storage solutions, duplicators and an array of media accessories.
